PLANTING GUIDE FOR 1949

CARLTON NURSERY COMPANY

EXTENSIVE GROWERS OF NURSERY STOCK

FOREST GROVE, OREGON

OVER HALF A CENTURY OF DEPENDABLE SERVICE

The Broadest Guarantee Ever Made

We guarantee every plant, tree, or shrub that we ship out to be free from disease, true-to-name, and to arrive in perfect growing condition. If for any reason whatsoever, you are not satisfied that you have received 100 cents in value for every dollar sent us, we will refund your money. Our policy of "Every Customer a Satisfied Customer" means all that it implies, and we are here to give ABSOLUTE SATISFACTION.

Free Replacements

We will replace, free of charge, trees and/or plants that fail to grow—providing, that the planter follows our Planting Instructions. Request for replacements should be made in July, and replacement trees will be shipped in the fall. Free replacements will not be made, where loss is due to reasons beyond our control, such as from rodent damage, breakage after planting, or from neglect in watering and care.

Location

Please address all correspondence to:

CARLTON NURSERY CO., FOREST GROVE, OREGON.

Our nurseries are located in the fertile Willamette Valley, and the best soils obtainable for the propagation of nursery stock have been selected for producing **Carlton trees**. Our Office, Warehouse and Sales Yards are located on Highway No. 6 (Portland-Forest Grove Highway), just 21 miles from down town Portland. See map below.

IT'S EASY TO GET Carlton's Quality Trees

Mail Orders receive our personal attention and are shipped quickly. Quality unconditionally guaranteed.

Visit One of our Sales Yards—Visitors Welcome.

Main Sales Yard—On Highway No. 6, Forest Grove. (Open all day-light hours every day, including Sunday.)

Lebanon-Sweet Home Sales Yard—On Highway No. 20, 5 miles Southeast of Lebanon and 8 miles Northwest of Sweet Home. (Open all day, every day during planting season.)

Southern Oregon Sales Yard—On Pacific Highway No. 99, 4 miles South of Medford. (Open all day, every day during planting season.)

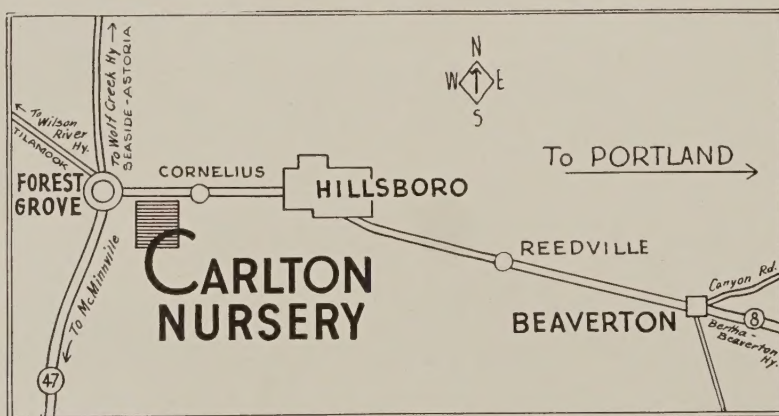

A BRAND NEW GIFT IDEA THAT BRINGS LIFETIME JOY!

... GIVE PLANTS ANY TIME OF THE YEAR
THROUGH OUR GIFT CERTIFICATE PLAN

- Issued for amounts \$3.00 and up.
- Redeemable anywhere in the U.S.A. at over 1000 Nurseries Coast to Coast.
- A Living Gift of Evergreens, Roses, Shrubs, Vines and Fruit Trees.

... For All Holidays—Always Appreciated.

SOLVES ALL YOUR LOCAL AND LONG DISTANCE GIFT PROBLEMS

Information

PLANTING SEASON: Fall, Winter and Spring (6 to 8 months), are ideal for planting in the West. Deciduous trees and plants—November to May. Evergreens, Rhododendrons, etc., October to June.

TIME TO ORDER: Orders are accepted any season of the year, for delivery at the proper planting time for your locality.

SHIPPING: We pay all shipping charges West of the Rocky Mountains, excepting on balled evergreens as noted on pages 28 to 36. **Parcel Post** regulations limit the size of shipments which may be sent by mail. Roses, shrubs, small fruits, small orders of trees, etc., can usually be sent by mail. Most evergreens, etc., are necessarily sent by Express or Auto Freight.

SUBSTITUTION: Please state when ordering an assortment whether substitution will be allowed, as we feel at liberty, when no instructions accompany the order, to use similar or better varieties when we are out of the kinds named. Check the square Yes or No on the order blank.

TERMS OF PAYMENT: Customers will please forward cash with the order. If your order is over \$5.00 and is to be sent C.O.D., send 25% cash with the order.

Bud Selection

SUCCESS IN FRUIT AND NUT TREE PLANTING depends solely on the selection of **BUDS** from trees producing quality as well as quantity and to have been budded on the proper variety of Root systems adaptable to various soil conditions. **WE ACCEPT THIS RESPONSIBILITY.**

Our foundation root stocks, our scion and bud wood, and the resulting mature trees are rigidly inspected by and in cooperation with the State Department of Agriculture and the Oregon Experiment Station.

SATISFACTION: We have thousands of satisfied customers and solicit inquiries from new customers and **COMMERCIAL PLANTERS**. We assure you that your order will receive our careful personal service and attention.

Carlton trees are free of dangerous pests and diseases, and can be shipped into any State of the Union.

Facts About Carlton's Quality and Dependability

Every workman is especially trained for his work in growing, handling, grading or packing for shipment, and each operation receives personal supervision.

All Carlton trees are pruned, trained and shaped in the nursery row. Most varieties of Fruit trees are topped at the proper height for branching, thereby developing a uniform, branched top in the nursery row. We are the only nursery on the West Coast offering this high quality type of tree, which gives the planter the thrift of a yearling and the quality and size of a two-year tree.

All tree varieties are carefully marked in the field with true name and registration number. Field charts are carefully checked and recorded, and all registration numbers are available to the planter on request. Carlton trees are not only **true-to-name**, but the strains are better.

All crooked and inferior trees are discarded and only first quality trees are sold.

You'll Grow Better and More Fruit with Carlton Trees.

(Branched tops, except a few varieties like Sweet Cherry)		
Medium Size —Two year trees, 3 to 5 ft. tall.....	1.00	.90 ea.

ORCHARDISTS NOTE: Please write for Special Commercial Price on 50 or more trees of a class.

Buy Freshly Dug Trees and Plants Direct from the Grower

IMPORTANT

We can supply the smaller grade fruit trees which are often quoted in unclassified Bargain Offers, and we will be glad to quote them on request. We do not, however recommend them for Home Orchard Planting—knowing that the larger size, better quality trees will give the greatest satisfaction.

One good Fruit Tree costs less than a box of fruit, but it will itself produce many boxes of choice fruit very soon after it is planted.

We invite your comparison of our Prices, Grades and Quality. The Fruit Trees described in this Catalog, and priced above are all Two Year Nursery Grown, liberally graded and strictly first Quality trees. There is a vast difference in trees sold on the market today—Trees quoted by height alone are usually undersize and often No. 2 quality. **BE ASSURED OF THE BEST BY ORDERING CARLTON TREES.**

A Complete Home Garden Orchard of 4 Trees

Plant Only Four—COMBINATION FRUIT TREES—Harvest Nineteen Varieties of Fruit

Home owners and tree lovers will find a never ending source of interest in growing these "Combination" Fruit Trees. A single tree with three to five varieties of fruit, ripening over a long season, will produce fruit for every purpose. The "Combination" tree is very ornamental, too, with its display of contrasting colors, shapes and sizes of fruit and makes an ideal shade tree for the small yard. OUR "Combination" fruit trees are especially grown on selected heavy, straight trees, which are root pruned to develop a well branched root system. Quality Supreme—well shaped, branched at the proper height, and good, husky trees.

Combination Pears, page 5; Apples, page 6; Plums, page 10; Cherry, page 12.

Genuine Dwarf Trees

When fully grown, the maximum height of dwarf trees is not over 10 feet, and by proper pruning they can be kept down to six feet. The fruit, which is of true variety, is within reach of easy picking.

Please refer to Fruit Section for descriptions.

Espalier Fruit Trees

Beautify your home with an "Orchard" growing on vines! Espalier Fruit Trees grow in artistic vine-like patterns against any wall, trellis or fence. They yield an abundance of delicious fruit that is similar to that produced from regular trees. These unique trees add a distinctive touch of beauty to any home or garden.

Espalier Fruit Trees are propagated from true dwarf roots, which limit their size and growth.

Carlton's Better Nut Trees

Royal Filberts

THE WORLD'S FINEST FILBERT

Prices:	Height	Each
Extra Large, Select Branched	5 to 6 ft.	\$2.75
Commercial Grade	4 to 5 ft.	\$2.00

(Special prices on larger orders)

The Royal is a strong growing tree, which produces an abundant crop of super-large glossy shelled filberts. The rich flavor of the large Royal Nut kernel makes this variety a MUST for every Home Orchard.

Almonds

	Height	Caliper	Each
Extra Large, Select Branched	5 to 6 ft.	5/8 to 3/4"	\$2.00
Large	4 to 5 ft.	1/2 to 5/8"	1.50
Medium	3 to 4 ft.	3/8 to 1/2"	1.25

Plant two varieties for pollinization.

I.X.L.—Standard commercial variety. Hulls easily. Nuts are large and symmetrical. Shell soft, smooth, kernel large and well filled, tree a strong grower.

NONPAREIL—Most popular thin shell variety. Kernel long and narrow and of excellent quality. Tree is a vigorous grower, producing heavy crops of large, well-filled nuts.

NE PLUS ULTRA—An excellent type, good producer, pollinizer, nuts medium to large. Good flavor.

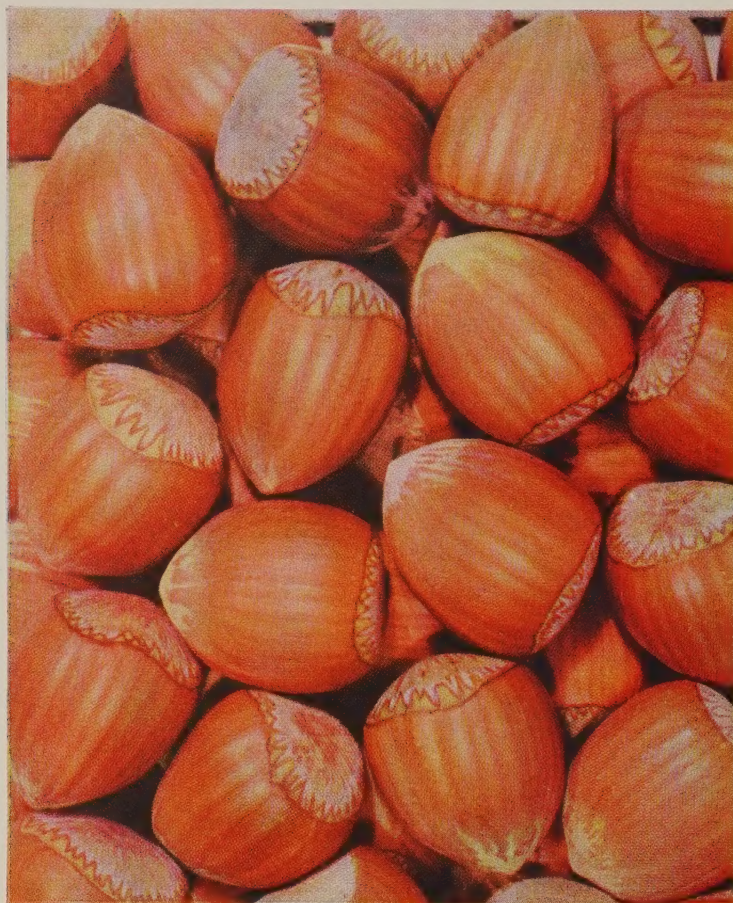

TEXAS PROLIFIC—An excellent type, good producer, pollinizer, nut medium to large. Good flavor.

English Walnuts

6 to 8 ft. Branched Tops	\$5.00 each
6 to 8 ft. Whips	4.00 each
4 to 6 ft. Whips	3.00 each
3 to 4 ft. Whips	2.50 each

(Special prices on commercial orders)

FRANQUETTE (On California Black Root)—Proven to be the best yielder, highest quality, and most hardy tree for the Northwest, blooming late enough to insure regular crops of finely filled nuts. This combination cannot be found in many sorts. The root system of our Walnut Trees is highly developed.

ROYAL FILBERT

Filberts

NURSERY GROWN TRANSPLANTS

Prices:	Height	Each
Extra Large, Select Branched	5 to 6 ft.	\$2.00
Large Branched	4 to 5 ft.	\$1.50
Medium Branched	3 to 4 ft.	\$1.25

BARCELONA—Most widely planted commercial variety. A large, round nut, fully self husking, rich in flavor, kernel uniform in size, clean of pellicle and very prolific when pollinized with about 15 per cent DuChilly and Daviana, alternated by setting every third tree in every third row to a pollinizer. Tree a strong, upright grower.

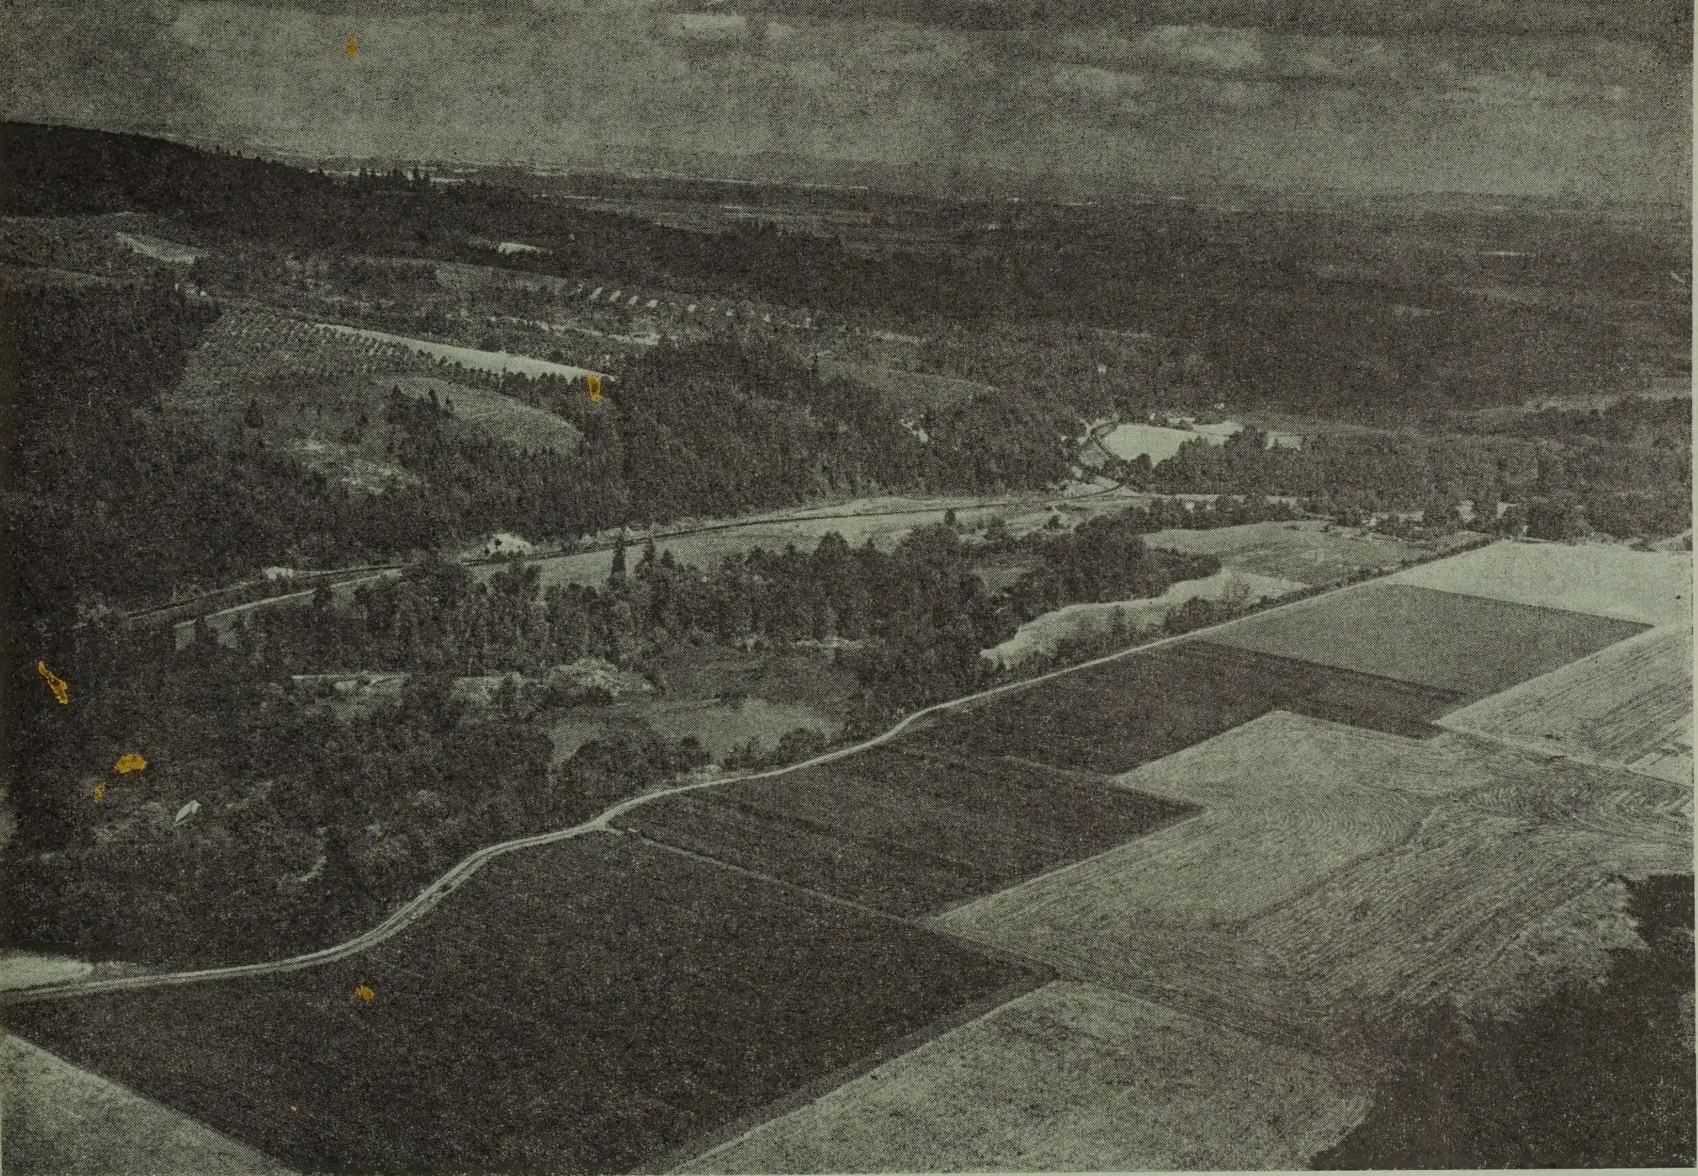

DU CHILLY—Pollinizer. A large, long nut, about 50 per cent self husking and balance readily husked by machinery or by hand, finest quality demanding a premium over Barcelona.

DAVIANA—Pollinizer. A long, striped nut of the DuChilly type, excellent pollinizer for Barcelona and DuChilly; not planted commercially, quality good and tree a very strong, upright grower.

Explanation—NURSERY GROWN TRANSPLANTS are secured in our Nurseries by lining out tip-layer (one year) trees, and growing them a second year in a Nursery Row. The highly developed root system obtained in this manner, assures the planter of a quicker start and more thrifty growth when planted.

PLEASE READ THE PLANTING INSTRUCTIONS ON THE NEXT THREE PAGES

INFORMATION AND PLANTING SUGGESTIONS

We are interested in your success with every tree or plant we send out; we exercise the greatest care to place every item in the hands of our customers in the best possible condition, and in order to furnish some precautions and provide for complete satisfaction, we give a few hints on such points as are most essential.

TIME TO PLANT—Trees and plants usually become dormant about the 1st of November, and may be planted throughout the fall, winter and spring months. Fall and winter planting is preferred for the reason that the roots become established during the winter months, and are ready to make a vigorous growth when warm weather begins. However, excellent results are obtained with early spring planting.

CARE OF TREES ON ARRIVAL—Unless you are prepared to plant them immediately upon arrival, dig a trench large enough to accommodate the roots; cut the bottom string, and spread the roots carefully, firming the soil about them. **DO NOT PERMIT THE ROOTS TO DRY OUT OR FREEZE.**

PREPARING TREES FOR PLANTING—Many failures of newly transplanted stock are due to the lack of proper pruning. When the trees are dug in the nursery, some of the feeding roots are left in the ground, therefore, when transplanting, it is necessary to restore the balance between the roots and the top by removing part of the tops.

In pruning, make a clean sharp cut. Do not leave stub ends in removing branches. Pruning shears, or a sharp knife, are the best tools to use. Never break pieces off with your hands—make a clean cut.

FRUIT TREES—On branched trees such as most Apple, Pear, Peaches, etc., select three to five side branches on different sides of the trunk and 6 to 8 inches apart and cut back about one-half (three-quarters on Peach stock) their length. Try not to leave two branches nearly opposite. Cut off the top of tree to about 24 to 36 inches from the ground. Whip trees should be topped about 24 to 40 inches from the ground.

SHADE TREES—Do not cut off the leader or main stem, but prune to avoid crowding branches, by thinning out the short branches, and cutting back all the other side limbs.

Roots on all trees and plants should be trimmed back one-half inch or more, cut long roots to balance, cut off all broken or bruised roots.

PLANTING—Dig the hole larger than is necessary to admit all the roots in their natural position; then having the tree pruned as directed, hold it in an upright position, and shovel the soil, carefully putting the finest and best dirt from the surface in among the roots, bringing every root in contact with the soil, firming gently with the foot. The tree should be planted about the same depth, or an inch deeper, than it was in the nursery row; this may be determined by the change of color in the bark.

Commercial and natural fertilizers are valuable when properly used. Do not let strong fertilizers come in direct contact with the bare roots.

WATERING—Artificial watering is highly desirable. Do not sprinkle, but give the plant all the water it will take at one time. No more water need be applied for several days when this is done.

DO NOT EXPOSE ROOTS UNNECESSARILY TO SUN OR WIND. TREES AND PLANTS SHOULD BE PLANTED AS SOON AS POSSIBLE AFTER THEY ARRIVE. KEEP MOIST UNTIL PLANTED. IF NOT PLANTED IMMEDIATELY "HEEL IN" IN MOIST SOIL.

① COVER ROOTS WITH MOIST SOIL, BURLAP OR WET NEWSPAPER UNTIL PLANTING HOLES ARE READY.

② CUT OFF ALL BROKEN ROOTS WITH A SHARP KNIFE OR PRUNING SHEARS. MAKE A CLEAN CUT WHICH WILL HEAL QUICKLY.

③ DIG HOLE LARGE ENOUGH TO ADMIT ALL THE ROOTS IN THEIR NATURAL POSITIONS, WITHOUT CROWDING. SET TREE ONE INCH DEEPER THAN NURSERY GROUND MARK.

④ HOLD THE TREE UPRIGHT; SHOVEL THE BEST TOPSOIL AROUND ROOTS, FIRING GENTLY WITH THE FOOT.

⑤ TREES AND PLANTS MUST BE PROVIDED WITH AMPLE MOISTURE THE FIRST SEASON. RETAIN MOISTURE BY THOROUGH CULTIVATION, MULCHING AND WATERING.

⑥ DO NOT LET FERTILIZER COME INTO DIRECT CONTACT WITH THE BARE ROOTS

PRUNING FOR PLANTING

BEFORE PRUNING SAME TREE AFTER PRUNING

WHIP TREES

BEFORE PRUNING SAME TREE AFTER PRUNING

BRANCHED TREES

WRONG RIGHT

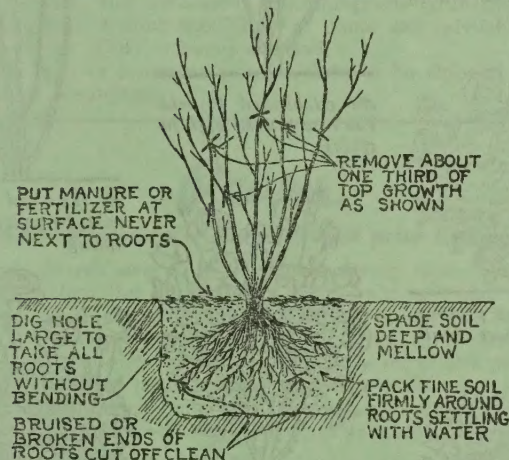

ALWAYS CUT TO "OUTSIDE" BUDS

MOST GARDENING FAILURES

result from **Improper Planting and After Care!**

- Remember the first season for newly planted material is the most critical.
- Don't neglect watering during dry spells, especially for the first two years, or until the plants become well established. Sprinkling is not sufficient—soak plants thoroughly during Spring and Summer months.
- Cultivate or hand hoe the planting beds to a depth of approximately 3 inches, to loosen the soil and keep down weed growth.
- Keep plantings well fertilized, especially large, growing trees, roses and shrubs.
- Be sure to spray or dust at the proper time.
- Do what pruning or trimming is recommended or have this done for you.

HOW TO PLANT SHRUBS

HOW TO PLANT EVERGREENS

1. DIG A HOLE ONE FOOT LARGER AND DEEPER THAN THE BALL OF EARTH ON YOUR EVERGREEN. PROVIDE GOOD, LOAMY TOP SOIL TO FILL AROUND BALL.

Important!! WATERING EVERGREENS

Many plants are lost because of insufficient watering through the months of **March and April**, when spring rains appear to be enough but are shed off by tree and ball becomes dry.

HOW TO PLANT

CURRANTS and GOOSEBERRIES—Cut off half the tops and plant 4 or 5 feet apart. Each year, as soon as fruit is gathered, cut and burn all wood 3 years old. Allow 5 or 6 new shoots to develop each year.

RASPBERRIES, Red and Black—Plant 3 or 4 feet apart in rows 6 feet apart. Set plants 1 or 2 inches deeper than they were in the nursery. Cut back all bushes to six inches or less of the ground. After fruiting, cut out old canes and burn, leaving a few vigorous new canes for fruiting the following year.

GRAPES—Dig a broad, deep hole and fill to the right depth for planting with compost or rich soil. Trim roots slightly and cut back top to one stem with 3 or 4 strong buds. Always plant firmly.

STRAWBERRIES—Cultivate land deeply before planting. Shear long roots back to about four inches. Set plant with the crown at surface or a little below. Spread roots out in fan shape and hanging down to their full length. Firm dirt around roots, leaving loose soil around plant at the surface.

RHUBARB—Plant three feet apart in rich garden soil, with buds 1 inch below level of ground.

ASPARAGUS—Plant in rich soil a foot apart in a furrow 6 inches deep. Cover 3 inches and tramp. In hoeing, work soil toward the plant so that by midsummer the ground is level. Do not cover 6 inches deep at first or plants will smother. Cut only sparingly the second year. Fertilize Asparagus and Rhubarb liberally with stable manure every year.

HOW TO GROW CAMELLIAS, RHODODENDRONS AND AZALEAS

Camellias, Rhododendrons and Azaleas require acid soil. If soil is not naturally acid it should be made so by the application of acid fertilizer, and peat moss. Applications should be made during the early spring months, or in the late fall. Provide sufficient drainage during the winter to prevent bud dropping. Plants require additional moisture during dry summer months. Careful cultivation of these plants will stimulate root action. Pruning to improve their shape should be done immediately after blooming. Picking the camellia blossoms will not harm the plants, but do not cut long stems, as they are slow growing.

PLANTS OR TREES REQUIRED PER ACRE

6 x 6 feet.....	1210	22 x 22 feet.....	90
8 x 8 feet.....	680	24 x 24 feet.....	75
10 x 10 feet.....	435	25 x 25 feet.....	69
12 x 12 feet.....	302	30 x 30 feet.....	48
15 x 15 feet.....	193	35 x 35 feet.....	35

TYPICAL GROWTH HABITS OF ROSE TYPES

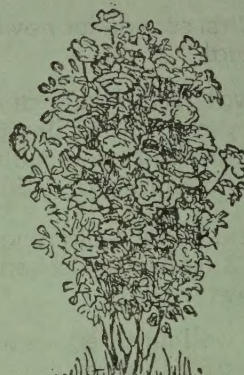

Shrub Rose

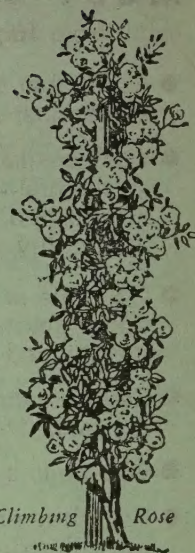

Miniature

Floribunda

Hybrid Perpetual

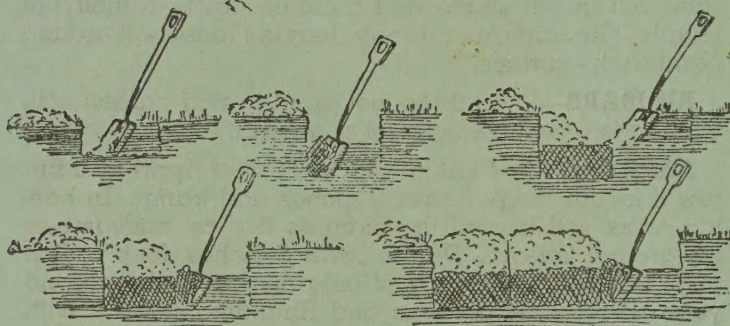

Climbing Rose

Tea

Hybrid Tea

PLANTING

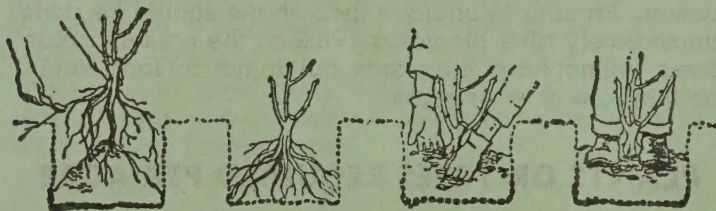

Preparing soil for rose-bed by working manure into the bottom.

Showing the "bud" placed just under the surface when planted

Keeping the roots in water or thin mud until planted to prevent their getting dry.

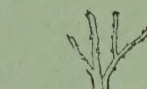

DISEASES

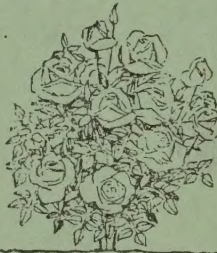

Black-spot is an easily recognized enemy of roses. Burn all leaves showing evidence as soon as you find them. If you spray before this nuisance is likely to appear, you may not be troubled at all.

Mildew can be controlled with Bordeaux mixture or sulphur dust which are the standard fungicides for both the diseases illustrated here.

PRUNING

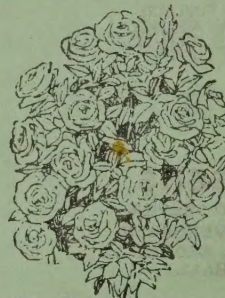

A Hybrid Tea pruned close in spring

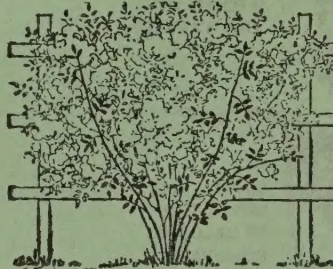

An established Hybrid Tea rose pruned high in spring.

Result of close pruning—low, compact bush, large flowers.

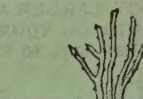

The result of high pruning. Note bare legs and tall growth.

The result of close pruning—compact growth, large flowers.

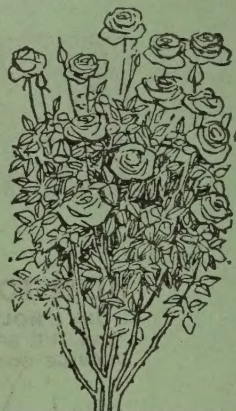

Climber in bloom. Note the new growth.

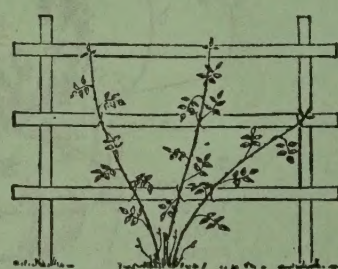

A Hybrid Perpetual rose pruned close in spring.

A Hybrid Perpetual rose pruned high in spring.

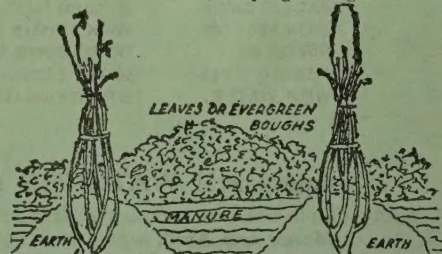

The result of high pruning. Note lanky growth and bare base

After blooming remove wood which bloomed, keeping new growth.

WINTER PROTECTION

Winter protection in cold climates. The tops of newly planted roses are usually cut back farther than shown here.

Carlton's Better Fruit Trees

GIFT SUGGESTIONS

Let Your Christmas, Anniversary, and Birthday Gifts "Live"

One of the most appreciated gifts for your garden friend is a "Living Gift" of a Camellia, Rhododendron, Azalea, Rose, Tree, Shrub, Vine or Plant.

The QUICK-EASY way to solve all your GIFT PROBLEMS . . . but more important . . . THE MOST SATISFACTORY.

EASY FOR YOU—No bother of packing and shipping.

Just send us the following information:

1. Select your Gifts from our 40-page Catalog.
2. To whom is the Gift to be shipped? (and address).
3. Who is the Gift from? (signature for Gift Card).
4. The occasion? (Christmas, Birthday, etc.)
5. When do you wish Gift shipped? (Don't hesitate to order, even though conditions are not right for planting on the date of the occasion. We will be glad to send a Gift Certificate, advising that shipment will be made later.)

WE'LL DO ALL THE REST: Your Gift will be shipped prepaid* to destination, and we'll send an appropriate card (Christmas, Birthday, etc.), signing the "Giver's" name and advising when and how the "Gift" is being shipped.

*Add 15% of purchase price to Gifts to be shipped East of the Rocky Mountains.

Pears

PRICES: Please refer to condensed price list, page 3.

The pear thrives over a wide range—being able to stand more summer heat than the apple. The French pear root also withstands heavy wet soils much better than most fruits. The popular Bartlett rules supreme as a summer pear, but some of our fall and winter varieties are even finer in quality and flavor, and all lovers of fine pears should include some of these in their home gardens. Unlike most other fruits, the pear develops much better quality when ripened off the tree, and the fruit should be picked before it begins to soften.

Best Shipping Sorts: Bartlett, Bosc, Comice, Anjou, Winter Nelis.

Cannery Sort: Bartlett.

SUMMER VARIETIES

BARTLETT—A well-known favorite for eating fresh or canning. Large size, buttery, juicy and high flavored. August to September. See colored illustration.

CLAPP'S FAVORITE—Large finely textured pear resembling Bartlett. Pale yellow color with brown dots, melting, buttery, juicy, delicately flavored. Ripens about two weeks ahead of Bartlett.

RED BARTLETT PEAR (Patent Applied For)

Postpaid Prices:	Each
No. 1, 4-6 ft. (½" to ⅝" Caliper)	\$2.00
Three Trees for \$5.00	

The Red Bartlett pear, developed from a bud sport in the A. D. McKelvie orchard at Zillah, Washington. The quality, shape, and size of this new fruit is identical to that of the popular Bartlett, which has long been the favorite home and commercial canning pear. The new Red Bartlett has about 10% more sugar content than the regular Bartlett. The color is cherry-red color after storage.

Combination Pear Trees

FOUR VARIETIES on One Tree . . . \$5.00 each

THREE VARIETIES on One Tree
\$4.00 each

(All Pear trees include Bartlett,

Anjou, Golden Russet
or Gorham.)

For descriptive
information, refer
to page 3

BARTLETT PEAR

AUTUMN AND WINTER VARIETIES

BEURRE D'ANJOU—A fine pear; rather large; flesh yellowish white, rich and vinous flavored. Tree good grower and productive. October and November.

GOLDEN RUSSET (Bosc)—Large, deep yellow, russet colored and long neck. Half melting, juicy, delicious, with pleasant odor. Good shipper. September.

DOYENNE DU COMICE (Royal Riviera)—Skin rich yellow at maturity, often lightly shaded with crimson. Flesh white, fine grained and melting, sweet and rich. Very good. October to November.

GORHAM—Large size, golden yellow when ripe, resembles Bartlett, ripens about two weeks later; fine flavored and firm texture.

FLEMISH BEAUTY—Large fruit; pale yellow, becoming reddish brown at maturity on the sunny side. Flesh yellowish white and juicy. Excellent for canning. Late September.

WINTER NELIS—Tree hardy and thrifty. A delicious winter pear of medium size; flesh yellowish white, very juicy when ripe. One of the very finest for eating fresh. December to February.

WINTER BARTLETT—Fruit large, closely resembling the famous Bartlett in shape, flavor, and appearance but ripening considerably later.

Proven Old Favorites And New

Our stock includes the best of the proven old favorites as well as the dependable newer varieties, covering a range of seasons and uses to meet all requirements.

The following profitable new varieties of merit should be planted by commercial planters desiring the best: Bright Red Rome, Solid Red Delicious, Yellow Delicious, Red Gravenstein, Red Spy, and Yellow Transparent. These are money makers. Order today.

Combination Apple Trees

FIVE VARIETIES on One Tree.....\$5.00 each
FOUR VARIETIES on One Tree.....\$4.50 each
THREE VARIETIES on One Tree.....\$4.00 each

(All Apple trees include Gravenstein, one additional early Apple, and two or three selected late varieties.)

For descriptive information on Combination Trees—See page 3

Apples

PRICES: Please refer to condensed price list, page 3.

Apples in this catalog are classified according to their seasons of maturity or use, such as "Summer", "Fall" and "Winter".

SUMMER VARIETIES

YELLOW TRANSPARENT—Earliest summer apple; always in demand for sauce or pies. Skin golden yellow; flesh white, fine grained, juicy, crisp, tender and sub-acid.

GRAVENSTEIN—An old-time favorite cooking apple in any form, especially fine for pies; crisp and juicy. Hardy and bears young.

RED JUNE—Always a favorite variety. Skin attractive red; flesh juicy, somewhat tart flavored. Hardy and productive.

RED GRAVENSTEIN—Bright red, juicy flesh, excellent flavor, good shipper and desirable as a commercial sort.

WHITE ASTRACHAN—An early, large greenish-white apple. Flesh highly acid, making it one of the best cooking apples.

LODI—Similar to Yellow Transparent, but a stronger growing tree, and a regular producer.

FALL VARIETIES

KING—A large waxy yellow-green apple with red striping. Very good keeper, excellent dessert and baking apple which is also in demand by the market. Late September.

GRIMES GOLDEN—Rich golden yellow, excellent eating and cooking apple. Flesh crisp, juicy and sub-acid.

WEALTHY—Almost full red in color. The flesh is white with trace of red. Fruit is very juicy and has a delicious flavor.

YELLOW BELLFLOWER—Oblong ribbed fruits. Yellow skin touched with green and blushed pink. Cooking variety.

All of our fruit tree Budwood is **SELECTED** (not gathered), in cooperation with the State Experiment Station and the Oregon Department of Agriculture.

RED DELICIOUS

WINESAP

WINTER VARIETIES

BALDWIN—One of the old favorites. Hardy, rapid grower. Fruit large, round, deep red, crisp and juicy. Good family variety.

BRIGHT RED ROME—A magnificent "double red" Rome Beauty; very early bearer; excellent shipper; a sure cropper.

DELICIOUS—This is the original Delicious and all that is claimed for it. It is a thrifty grower, hardy and prolific bearer. Highly flavored, excellent quality and a good keeper.

RFD DELICIOUS—Large brilliant red, flavored sweet, lightly touched with acid. Flesh fine grained, crisp and juicy. Preferred for eating. Good keeping qualities.

YELLOW DELICIOUS—A wonderful apple; an early bearer of beautiful yellow apples; good shipper.

NORTHERN SPY—A fine, large striped red, tender, mild, juicy apple, excellent eating or cooking. Keeps well up to June. Strong growing trees.

RED SPY—New, from New York Experiment station; typical Spy except in color; solid bright red; very hardy and productive.

ROME BEAUTY—Large, yellow and bright red. Flesh yellowish, tender, juicy, sub-acid. Good bearer, excellent cooking apple.

YELLOW NEWTOWN PIPPIN—This stands as high as any apple; a market and cooking variety. One of the best keepers known. Flesh rich, juicy and crisp.

SPITZENBERG—Medium to large, deep red, spicy, crisp flavor, an old favorite, good cooking and eating. Fine keeper.

RED SPITZENBERG—A solid rich red Spitzenberg of high flavor and quality.

WAGENER—Medium to large; deep red in the sun. Flesh is firm, sub-acid and excellent flavor. Very productive, even when young. December to April.

JONATHAN—Red and yellow, juicy, rich flavor, tender flesh. Very productive. Good commercial apple. Fine eating.

RED JONATHAN—Same type and quality of Jonathan, but a solid red highly colored apple.

WINTER BANANA—Large, clear waxy yellow with blush, fine tart flavor, good cooking and eating, crisp.

WINESAP—One of the standard commercial varieties due to its excellent keeping qualities. Dark red skin; juicy, sub-acid flavored flesh.

RED STAYMAN—New rich dark red Stayman. Heavy bearer, firm texture, delicious spicy flavor. Late keeper, good commercial and home apple.

Crab Apples

PRICES: Please refer to condensed price list, page 3.

HYSLOP—September to October. Fruit medium; yellow with shadings crimson maroon; flesh fine, firm, yellow, astringent; bears abundantly. Ornamental. One of the most desirable sorts for culinary purposes.

RED SIBERIAN—An inch in diameter; clusters; bears young and abundantly. August to September.

WHITNEY—August. Fruit large; yellow, striped with red and covered with red on sunny side; flesh yellow, very juicy and fine grained; flavor rich and almost sweet.

NECTARINE

Nectarines

PRICES: Please refer to condensed price list, page 3.

In growth, habit, treatment and soils precisely similar to peach. Valuable for dessert; smooth skin.

BOSTON—Medium; deep yellow, with a bright blush and deep mottlings of red; flesh yellow without any red at the stone; sweet. Freestone.

QUETTA—(New.) Yellow meated and highly colored. Very hardy.

STANWICK—Extremely large fruit, skin pale green, shaded purplish red; flesh white and juicy, with a most delicious flavor.

DIXIE—Large size, highly colored skin, deep yellow flesh. One of the finest of all for eating and home use.

WESTERN PRIDE PEACH

This wonderful Peach is of our own origination, being obtained by us from a seedling Peach grown at Ontario, Calif. We have been growing this Peach for the past fourteen years under the name of Improved Rochester. Not until six years ago did we realize that it was of outstanding quality and since that time have been putting it through all the tests required of a truly good Peach. It has proven a wonderful canning and shipping variety and we highly recommend it for both home and commercial planting. We feel that this Peach is deserving of a new name, resembling Rochester only in ripening season. Fruit is of large size, highly colored, yellow with generous portions tinged deep red. Flesh golden yellow, firm, deliciously flavored, entirely freestone. A consistent producer, bearing when other Peaches fail. Ripens following Rochester. One of the earliest good canning Peaches, practically fuzzless, excellent shipper. Write for prices 50 or more trees.

Add 25c per Tree to Price Schedule on Page 3

Plant Peaches for Quicker Profits

Best commercial peach sorts for the Northwest and Pacific Coast. All Freestones. Improved Early Elberta, J. H. Hale, Rio Oso Gem, Western Pride, Rochester, Elberta, Golden Jubilee, and Hale Haven.

"These are money makers."

PRICES: Please refer to condensed price list, page 3.

LISTED IN RIPENING ORDER

MAYFLOWER—One of the earliest peaches. Medium sized, creamy white fruits, mottled with dark red; firm, white, juicy flesh.

ALEXANDER—One of the finest early peaches. Greenish-white skin, shaded red; white flesh, very sweet and juicy.

NECTAR (Plant Patent No. 86)—Finely textured white-fleshed peach of distinctive flavor suggestive of nectarine. Almost fuzzless and with an appetizing aroma. A fine early ripening freestone. Add 20c Royalty.

Carlton's Better

BABCOCK—The fruit is almost round, above medium size; colored beautiful pink to deep crimson. The skin is exceptionally smooth; flesh white. Recommended for regions having a mild winter only.

ARPS BEAUTY—Elberta type, hardy, prolific. Skin yellow, mottled bright crimson. Flesh is yellow, firm, juicy, excellent flavor. Semi-clingstone.

HALES EARLY—One of the very best early white peaches. Skin greenish, splashed with red. Flesh white, juicy and sweet.

RED HAVEN—Tops all extra early peaches. Earliest yellow freestone, ripening about 10 days before Golden Jubilee. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. See illustration.

GOLDEN JUBILEE—The wonderful new yellow freestone ripening ahead of Rochester, making it a highly profitable sort of excellent quality. Firm, rich in sugar, delightfully fragrant.

ROCHESTER—Has the habits and characteristics of the Crawford, but fully two weeks earlier. Yellow, freestone, good size, very sweet, fine flavor. Requires only half the usual amount of sugar for canning.

SLAPPY—Fruit yellow, good keeper; excellent flavor, fine grained, rich. Hardy, early yellow peach. Excellent quality.

CHAMPION—Best of white freestone varieties. Skin creamy-white with red flesh. Extremely hardy and of uniform good quality.

EARLY CRAWFORD—Has all characteristics that gratify taste. Color rich red splashed and mottled with darker red and golden yellow. Flesh is beautiful and perfectly free from stone. Matures in mid-season. Vigorous and productive.

HALE HAVEN—A wonderful new, extremely hardy shipping peach, ripening between Rochester and Improved Elberta. Immense golden yellow with a red cheek and a strong protective skin. This fine grained, firm, rich, golden fleshed freestone bears very heavy crops at an early age. Very profitable. An improved South Haven.

GIANT ELBERTA PEACH (Patent Applied For)
The Giant Elberta peach, developed from a seedling in an Elberta orchard. Hardy, fast growing, very prolific tree producing fruit at least one-third larger than the standard Elberta. Fruit is a deep yellow overlaid with brilliant red, perfectly freestone, flesh firm and finely textured. It ripens evenly on both sides at same time, and about 10 days earlier than the standard Elberta.

Giant Elberta Peach: Add 25c per Tree to Price Schedule on Page 3

Peaches

IMPROVED EARLY ELBERTA—This peach is the "Queen" of all canning peaches, and no doubt the biggest selling peach on the market. Fruit is a beautiful golden yellow, blending into a glorious deep pink on the sunny side; a strong protecting skin; exceptionally heavy bearer and a wonderful pollenizer for the J. H. Hale. Ripens about two weeks earlier than Elberta. A truly super-quality canning peach.

J. H. HALE—Peach growers have demonstrated during the past several years that this is a profitable variety. Fruit is of largest size, highly colored; flesh is yellow, exceedingly firm; flavor is unexcelled. Fruit ships exceedingly well; remains on the tree in a firm condition for a longer time than any other freestone. **The true type J. H. Hale.**

VETERAN—A yellow freestone of Canadian origin. Fruit is large, round, superior to Elberta in quality and ripens about two weeks before Elberta.

ELBERTA—Large yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific. Leading market variety.

RIO OSO GEM (U. S. Plant Patent No. 84)—(Add 10c per Tree)—A splendid new peach that ripens during the period when there is no other peach on the market. **Rio Oso Gem** ripens ten days to two weeks after J. H. Hale, is more highly colored, finer grained in texture, firmer and of better quality than J. H. Hale.

INDIAN BLOOD—Home use. Deep red flesh. Popular for pickling and other culinary uses.

IMPROVED ELBERTA

RED HAVEN

TUSCAN CLING—Commercial canning, shipping, and home orchard. Fruit of good size and attractive. Flesh yellow, with some red at pit. Flavor good.

ORANGE CLING—Home canning and shipping. Fruit very large; attractive. Flesh yellow and of good quality. Very productive.

SALWAY—Shipping, drying and home orchard. Flesh yellow, of fairly good quality.

Apricots

PRICES: Please refer to condensed price list, page 3.

TILTON—Fruit large size, rich apricot color, flavor of the highest quality. Bears immense crops, either for canning or drying.

PEACH APRICOT—An extremely early, very large, handsome color, firm, rich and highly flavored. Shipping sort.

WENATCHEE MOORPARK—One of the largest size apricots. Color deep apricot with brownish red when ripened in the sun. Flesh firm, juicy and parting from the pit, pleasant sweet flavor.

MORMON (or Chinese Apricot)—Hardest of all apricots. The fruit is large size with a firm, fine grained texture, exceptionally sweet flavor and retains its rich apricot color when canned.

PERFECTION—An exceedingly large size Apricot, good flavor, sweet and juicy. Trees bear abundantly at an early age.

Carlton's Better Plums

PRICES: Please refer to condensed price list, page 3.

BEAUTY—Early June. Shipping and home orchard. The earliest Japanese plum, important commercial variety. Fruit medium size, heart shaped, and crimson. The flavor is good. Tree productive; self-fertile.

BURBANK—Home orchard and shipping fruit of large size, almost round, yellow mottled with red. Flesh sweet and of good flavor. Ripens after Climax and before Santa Rosa.

CLIMAX—Large, heart shaped, cherry red fruit. Delicious juicy fruit ripens in mid-June. Tree bears heavily at an early age.

DAMSON—August-September. Local market and home orchard. A tart plum very popular for culinary uses. Fruit small, roundish, dark purple with heavy bloom. Very productive.

DUARTE—Late July. Shipping. A blood-red plum of late introduction. Fruit large and elongated; skin a dull red. Flesh firm, deep red, and good quality.

GREENGAGE—A medium small greenish yellow plum of high quality. Midseason.

PEACH PLUM—Fruit large and earliest to ripen; regular, roundish; skin red, dotted with a blue bloom; flesh greenish yellow; tinged with red at maturity; a rich brisk flavor; the leading market variety. Middle of July.

PRESIDENT PLUM

PRESIDENT—Late shipping variety. Large, oblong, dark blue fruit. Yellow flesh of fine texture. Heavy producer. Good culinary variety.

PLUMCOT—Early June shipping and market variety. Medium size, light crimson, good flavor suggestive of apricot.

SANTA ROSA—Large; purplish crimson; flesh yellow, mottled crimson; very good quality. Excellent for all purposes. Early July.

SATSUMA—A very large and well flavored plum with blood red flesh; skin blush red; very small pit; vigorous and productive. A well known variety much in demand for home canning. July.

RED ACE—Midseason. Big, red fleshed plum full of delicious juice. Freestone.

WICKSON—Large, yellow shaded crimson, flesh amber colored, sweet and juicy.

YELLOW EGG—Ripens end of August. A large, handsome yellow plum. Good for home use or market. Golden yellow covered with thick bloom. Flesh firm, sweet and juicy.

Carlton's Better Prunes

THE NEW PARSON SWEET ITALIAN PRUNE

TESTED AND PROVEN

Order Early—Avoid Disappointment

NEW PARSON SWEET PRUNE

This new prune has been nurtured for several years under test conditions and has proven superior in many respects to other varieties. It is hardy against unfavorable weather conditions and bears at an early age. The fruit dries heavily without drip or run and remains the same for long periods of time. Although of remarkable sugar content, dried fruit does not whiten with sugar rising to the surface. Laboratory analysis rates Parson Sweet Prune with 50.7% sugar content, compared with 41.0% for other Italian prunes. Mild sweet flavor makes it a possibility for special holiday gift packs. Because of the high sugar content, additional sugar for cooking or canning is unnecessary.

Fruit is ready for picking 10 to 12 days ahead of the Italian. Heavy bearing quality is noteworthy, even on new branch growths. An outstanding prune, a good shipper.

PARSON SWEET ITALIAN PRUNE

PARSON EARLY SWEET PRUNE—PRICES

5 to 6 feet No. 1 Trees.....\$2.50 each

(Pollenizers used: Deacon and Black Tartarian)

Descriptive information about Combination Trees—Page 3

SPECIAL NOTE TO ORCHARDISTS

Many beautiful cherry orchards, at 6 to 8 years old, quickly commence to die back and carry a lot of unhealthy structure, finally dying out completely. Avoid this terrible loss of time and money by buying your commercial cherry orchard from reliable nurserymen. We offer the finest of stock grown from bud selected sorts direct from the very finest cherry orchards in the west. We grow our cherry trees on whole roots of **true mazzard stock**. Many inferior cherry trees are offered annually by unreliable nurserymen. Buy only the best. Ours will stand the test of time.

In planting a cherry orchard care should be taken not to plant trees too close together; select a dry soil for the cherry, as a rule, although it is so hardy a tree that it will thrive in a great variety of soils. Use same care in planting as other trees.

HELP YOURSELF TO BETTER FRUIT!

Carlton's Fruit Trees Produce Better Fruit at an Earlier Age and Live to Produce Years Longer.

ROYAL ANNE CHERRY

Sweet Cherries

PRICES: Please refer to condensed price list, page 3.

Special Note to Commercial Planters—Our cherry trees are grown from heaviest consistent producing orchards. Pollenizers offered are taken from same proven blocks of Royal Anne, Bing, and Lambert.

BING—Very large, flesh solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety.

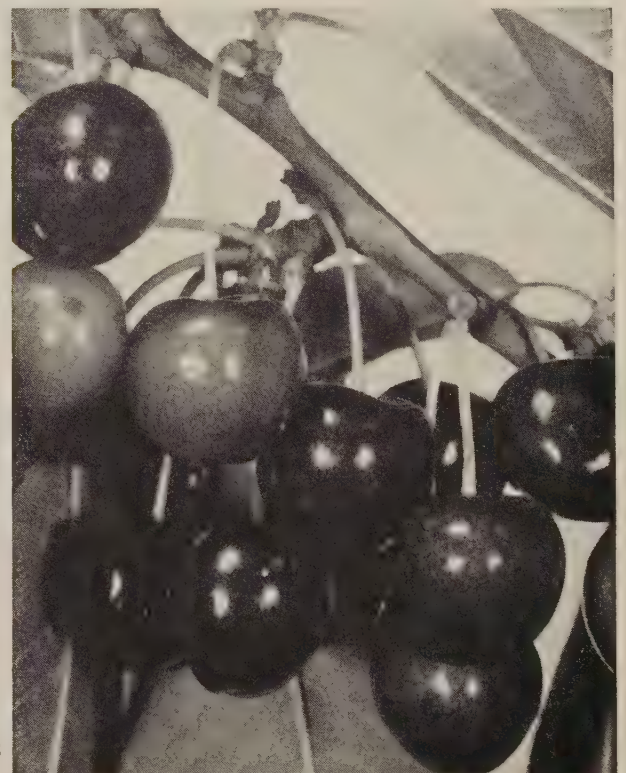

BLACK REPUBLICAN—Fruit dark color; rich, solid and an excellent keeper. Middle of July. Pollenizer.

BLACK TARTARIAN—Very large, purplish black, half tender; flavor mild and pleasant. Tree vigorous, immense bearer. Ripe last of June. Pollenizer.

DEACON—Similar to Black Tartarian in color and size, but superior in texture and shipping qualities. One of the most satisfactory for pollenizing.

LAMBERT—Size very large; form roundish, heart-shaped; color dark purplish red, meaty and of fine texture; semi-cling, small seed; flavor sweet or very mild sub-acid, aromatic, rich. Quality very good and an excellent shipper.

ROYAL ANNE (Napoleon)—Fruit large; light yellow with red cheek, very rich, solid, excellent keeper. The leading commercial canning cherry.

BING
CHERRIES

MONTMORENCY CHERRY

Sour Cherries

PRICES: Please refer to condensed price list, page 3.

MONTMORENCY LARGE (Sour Cannery Variety)—

This very hardy tree is a regular cropper, and bears immense crops at an early age. The fruit is large, fine flavor, shining red and valuable everywhere. Our Montmorency large buds are selected from the best proven blocks on the coast, and are highly recommended by the leading canneries.

EARLY RICHMOND (Kentish)—Medium size, bright red; flesh melting, juicy and rich acid flavor. Last of June.

ENGLISH MORELLO—Medium to large; blackish red, rich, acid, juicy and good.

LATE DUKE—Fruit large, roundish, rich, dark red, sub-acid. Ripens last of July.

MAY DUKE—One of the best hardy cherries; medium size, dark red, melting, rich and juicy. First of June.

Quinces

Postpaid Prices:

Postpaid Prices	\$1.50	\$3.00	\$10.00

A very productive plant of sweet, rich red berries. Plants bear young and over a long season, making it an outstanding variety. This variety does not produce runners and is propagated by crown divisions.

Cane Berries

Loganberry

Postpaid Prices:	Each	10
Heavy No. 1 Plants	\$.35	\$3.00

The fruit is large, long, an attractive red color, and although it is a little sour it is highly prized by a very great many people for jams and jellies and for mixing with raspberries and other berries in jams and preserves. The vines are trailing and have to be grown on trellis.

Boysenberry

Postpaid Prices:	Each	10
Heavy No. 1 Plants	\$.35	\$3.00

An immense new berry produced by crossing blackberries, raspberries, and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and soft seeds. The Boysenberry consistently produces heavy crops, bears young, and the fruiting season lasts two months. The vines are most hardy.

Youngberry

Postpaid Prices:	Each	10
Heavy No. 1 Plants	\$.35	\$3.00

The fruit is very large and very juicy, with a rich blended flavor that is pleasing to nearly everyone. The color so very dark red that it is nearly black and the seeds are few in number and soft. The vines are vigorous.

Nectarberry

Postpaid Prices:	Each	10
2-year Transplants	\$.50	\$4.00

Richest flavor of all. Heavier yielding over a long period. Fruits average even larger than Boysenberries.

RED

WASHINGTON—New, produces a very heavy crop of berries that are slightly larger than Cuthbert, firmer and brighter color. Disease resistant.

CUTHBERT—Very hardy, medium to large, firm and of excellent flavor, good shipper, at present the leading main crop raspberry.

NEWBURGH—New, the finest red raspberry. Its berries are large, heavy yielder, good shipper, and has rugged upright canes. Similar, but decidedly better than Latham.

WILLAMETTE—A new red raspberry of large size and very firm. This rich red berry has outstanding qualities for table use, home canning and freezing; produces two crops each season.

EVERBEARING

INDIAN SUMMER—A new two-crop Red Raspberry. The berries are large, medium red and of high quality.

BLACKCAP RASPBERRY

Postpaid Prices:	Each	10
No. 1 Plants.....	\$.30	\$2.50

MUNGER—Berries are large, attractive, firm and of the highest quality; rich, sweet and produced in abundance. Bush is hardy and vigorous grower.

Cascade Blackberry

Postpaid Prices:	Each	10
2-year Transplants	\$.50	\$4.00

A fine new blackberry introduced to bring the flavor quality of the wild plant into the home garden. Fruit resembles Loganberry in size. It is a heavy yielder and unaffected by blight. Rich, sweet flavor, excellent for jellies and pies.

LOGANBERRY

Thornless Berries

Postpaid Prices:	Each	10
2-year Transplants	\$.50	\$4.00

Thornless Youngberry

Superior to the parent thorny type to the extent that the hard punishing and annoying thorns are not present. In other respects there is little difference. Berries ripen a few days earlier.

Thornless Loganberry

This new berry has proven far more productive and the berries are larger than the old thorny type of Loganberry. A delightful, highly flavored berry of dark red color. The canes are large and entirely thornless.

Thornless Boysenberry

This thornless strain has retained all the good characteristics of its parent, including its rugged, thrifty growth and hardiness. You can handle these canes with your bare hands and enjoy picking the large, attractive fruits.

All berry plants we furnish are strong size, well-rooted and free from injurious diseases.

REMEMBER: We pay the postage.

Carlton's Better Blueberries

CULTURE

An acid soil, rich in leaf mold and with an abundance of moisture throughout the growing season, is a necessity for successful blueberry culture. Peat bogs, alder bottoms, willow and cedar swamps, when cleared, make ideal locations for blueberries, as do upland soils containing a large amount of leaf mold, and a natural or artificial supply of water. The foliage resembles that of azaleas and the dainty pink flowers, borne in clusters, are ornamental. Plant in groups of two or more for purposes of cross-pollenization.

Postpaid Prices:	Each	10
12-18 inch plants.....	\$1.50	\$13.50

RANCOCAS—Early, large berries, strong grower, good commercial berry.

RUBEL—Midseason, medium sized berries, good flavor, produces enormous crops.

JERSEY—Midseason, large sized berries, very sweet, vigorous bush.

ductive currants. Rich, mild, sub-acid flavor.

GROVER—Late season, berries large, delicious flavor.

BLUEBERRIES

Currants

Postpaid Prices:	Each	10
Heavy No. 1 Plants.....	\$.35	\$3.00

PERFECTION—Bright red. It is one of the most productive currants. Rich, mild, sub-acid flavor and having plenty of pulp with few seeds.

CHERRY—Very large currant, much the same quality of the Perfection; bunches short; plant vigorous.

RED LAKE—One of the newer currants. The fruit is large and bright currant-red in color. The vigorous bushes are very productive, and the long open bunches make picking easy.

Gooseberry

Postpaid Prices:	Each	10
Heavy No. 1 Plants.....	\$.35	\$3.00

OREGON CHAMPION — Berries medium, round, smooth, greenish-white with thin transparent skin; good quality and ripens early; bush vigorous and very free from mildew.

Table Grapes

European varieties of grapes produce best in the warmer climates. In the northwest, plant these varieties in well-protected, warm location.

Postpaid Prices:	Each	10
No. 1 Plants.....	\$.50	\$4.00

MUSCAT OF ALEXANDER—Large, long, somewhat loose bunch; berries elongated, slightly oval, amber color when ripe; flesh firm and brittle, sweet, rich, sugary. Used largely for raisins. September.

THOMPSON SEEDLESS—The best known seedless grape; widely planted for raisins, market and home fruit as well. Large bunch of rather small, amber-yellow berries; sweet and mild.

TOKAY—Very large bunch and berry, thick skin, pale red covered with bloom; firm sweet flesh. An old standard table variety. October.

RIBIER—Extra large, handsome black variety, useful for arbors. Mid-season.

SWEETWATER (White)—Medium size, sweet, rich.

RED LAKE CURRANT

Carlton's Better Grapes

Always Bear

Have Plenty of Grape Jelly, Jam and Juice

HOW TO PLANT GRAPES—Dig a deep, broad hole and fill up to the right depth for planting with compost or rich soil. Trim the roots slightly and cut back the top to three or four strong buds. Use rich soil and always firm earth around plant.

CONCORD GRAPE

Hardy American Grapes

Postpaid Prices:	Each	10
No. 1 Plants.....	\$.50	\$4.00

Special prices on large orders.

CAMPBELL'S EARLY—Handsome black berries with purple bloom; rich, keeps very well.

CONCORD—Fine black variety; juicy and sweet, splendid flavor; reliable and productive. One of the most popular and adaptable varieties. The standard grape in many sections.

WORDEN—Seedling of the Concord, which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is better flavored and ripens earlier than the Concord.

NIAGARA—Very large, round, golden white grape of musky flavor, grown in large, compact bunches. Ripens same season as Concord and is often called the "White Concord". Very hardy and prolific.

AGAWAM—Large bunches, red berries, tender and juicy; ripens early. Good bearer. A very fine table grape.

CACO GRAPE

New Hardy Grapes

Postpaid Prices:	Each	10
No. 1 Plants.....	\$.75	\$6.50

CACO—The new red grape. Of exceptional merit. Earlier than Concord. Wine-red, compact bunch, good size, hardy, thrifty grower. Good arbor variety.

FREDONIA—This new blue-black grape was originated and thoroughly tested by the New York Experiment Station. Ripens 15 days before Concord. Very large berries on compact bunches; spicy, sweet flavor and fragrant. Vines are hardy, thrifty, and heavy producers.

GOLDEN MUSCAT—Choicest golden amber-white grape for your fancy desserts and wines. Large, somewhat oblong berries in large, compact bunches. Rich, sweet, mellow, aromatic Muscat flavor. Wonderful keeper, shipper and producer.

ISLAND BELLE—Ripens middle of August to September. Keeps sound and perfect both on and off the vine for weeks, after other grapes are gone. Both clusters and berries are large, glossy black with attractive blue bloom; sweet and juicy. Stands at the head of

SENECA—One of the newer white grapes ripening about the time of Fredonia. Vine vigorous and hardy. Fruit in compact bunches, good size, sweet and juicy. Splendid for table and juice.

GLORIOUS (Pat. Rights Reserved)—Clusters of deep vermillion buds open to semi-double flowers of Tyrian rose. The well-branched bush is covered with blooms. Extremely vigorous. **Each \$1.50; 3 for \$3.75, Postpaid.**

HECTOR DEANE (Pat. No. 361)—One of the most fragrant of all roses, perfumes the whole garden. Carmine red in cooler weather changing to deep pink in warmer areas. **Each \$1.35; 3 for \$3.40, Postpaid.**

MARK SULLIVAN (Pat. No. 599)—Delightful combination of golden yellow shaded with rose-pink and cerise. A spectacular success in the northwest. **Each \$1.25; 3 for \$3.15, Postpaid.**

MME. HENRI GUILLOT (Pat. No. 337)—Pointed buds of raspberry-pink expanding into big exhibition flowers. Glossy foliage. **Each \$1.50; 3 for \$3.75, Postpaid.**

SATURNIA (Pat. 349)

NOCTURNE (Pat. 713)

MME. MARIE CURIE (Pat. No. 727)—An All America for 1944. Clear yellow blooms beautifully formed and sweetly fragrant. Color of flowers deepens in the Fall. Abundant foliage. **Each \$1.50; 3 for \$3.75. Postpaid.**

MRS. H. M. EDDIE (Pat. pending)—A new white rose on the deep cream side, large exhibition blooms and large foliage. **Each \$1.50; 3 for \$3.75. Postpaid.**

REX ANDERSON (Pat. No. 335)—Lovely ivory-white. Awarded First Class Trial-ground Certificate, National Rose Society, England. Abundant gray-green foliage. **Each \$1.50; 3 for \$3.75. Postpaid.**

SANTA ANITA (Pat. No. 539)—A true rose pink double bloom, slightly reflex petals with silvery sheen on outside. Bushy plant with plentiful foliage of light green. **Each \$1.25; 3 for \$3.15. Postpaid.**

SATURNIA (Pat. No. 349)—Exciting color contrast distinguishes this rose. Brilliant cardinal-red inside of petals, with reverse salmon-yellow and copper. Fragrant. **Each \$1.50; 3 for \$3.75. Postpaid.**

SHOW GIRL (Pat. No. 646)—Lovely pink deepening to scarlet-pink in cool weather. Profuse bloomer, generous foliage, needs plenty of room. **Each \$1.50; 3 for \$3.75. Postpaid.**

SONATA (Pat. No. 732)—Shapely buds of cochineal-red, outside of petals several shades lighter than inside. Very fragrant and ideal for cutting. **Each \$1.50; 3 for \$3.75. Postpaid.**

SWEET SIXTEEN (Pat. No. 631)—Salmon-pink to rose, with a touch of gold at base of petals, becoming all-rose when fully open. Sweetly fragrant. Good cut flower. **Each \$1.50; 3 for \$3.75. Postpaid.**

WHITE WINGS (Pat. applied for)—Pure, clear-white petals around a golden center crown form a glistening contrast to the laurel-green foliage. Blooms in pyramidal sprays. **Each \$1.50; 3 for \$3.75. Postpaid.**

FACTS ABOUT CARLTON'S QUALITY ROSE BUSHES

1. We sell and deliver only No. 1 grade and first quality Rose bushes. We do **not** handle No. 2 and boxed roses.
2. Every bush we send out is unconditionally guaranteed to be in perfect growing condition on arrival; to be free of disease and true to name.
3. Carlton bush roses will produce an abundance of bloom the first summer after planting (most climbing varieties bloom the second season).

ROSES . . .

OREGON FIELD GROWN ROSE BUSHES ONLY ONE GRADE — THE BEST

AUTUMN — A combination of deep burnt orange and pink, streaked with red.

CHRISTOPHER STONE — Scarlet crimson that does not blue; vigorous. Beautifully waved petals, long pointed buds. Heaviest blooming red known.

CYNTHIA — Immense double blooms of scarlet shading to a deeper red as they develop. Delightful fragrance; long lasting.

DAINTY BESS — Single crinkled petals of appleblossom pink; dark stamens. Continuous bloomer.

EDITOR McFARLAND — Long tapering pink buds with a glow of amber and a paler edge. Excellent for cutting.

ETOILE DE HOLLAND — One of the most popular brilliant crimson red roses. Oval buds, large double flowers, fragrant.

GRENOBLE — Long stems, brilliant red, almost scarlet flowers. Fragrant, excellent for cutting.

HINRICH GAEDE — Rich mixed colors of apricot-orange-scarlet, with glossy foliage. Long, strong stems.

WHY THESE ROSES

Rose varieties listed in this catalog have been selected in cooperation with recognized authorities on rose culture for their adaptability to Pacific coast and northwest growing conditions, as well as for their beauty and performance.

ETOILE DE HOLLANDE

CL. TALISMAN

PINK DAWN

SISTER THERESE

Queen of Flowers

JOANNA HILL—A charming orange-yellow vigorous growing, free blooming, fragrant rose.

K. A. VICTORIA—The old favorite, a white rose with shapely pointed buds. Exquisitely perfumed.

Mrs. P. S. DU PONT—Medium-sized long pointed buds of red-dish-gold, opening to semi-double flowers of golden yellow.

MRS. SAM McGREDY—Large double blooms of orange-salmon, with a suffusion of gold. Bronze foliage.

McGREDY'S IVORY—Symmetrical ivory buds opening slowly to immense white blooms.

McGREDY'S YELLOW—Well-formed buttercup yellow buds expanding to semi-double blooms of light yellow.

PINK DAWN—Deep rose buds opening to lovely pink blooms tinted with orange at the base of the petals. Fully double, sweetly fragrant.

POINSETTIA—Semi-double flowers of rich scarlet color, producing profusely throughout the season.

PRES. HOOVER—A glorious rose with charming combinations of cerise-pink, flame, scarlet and gold.

SISTER THERESE—Chrome-yellow, perfectly formed buds tinged with carmine. The light yellow open blooms, spicily fragrant, develop deeper tones of apricot and gold.

TALISMAN—A most popular rose, fine for cutting. Blended colors of orange, yellow, rose-red and scarlet on a background of old gold.

THE DOCTOR—Curling pointed buds of dark pink open to semi-double blooms of rich pure pink, intensely fragrant.

CL. PAUL'S SCARLET

CLI. PAUL'S SCARLET—The most popular of all red climbing roses. Vivid scarlet flowers of large size produced in clusters.

Climbing Vines

Vines provide comforting shade and colorful beauty. Nothing lends such pleasing effect to wall or veranda as gracefully trained vines.

Postpaid Prices:

2 Year No. 1 Plants \$1.25 each; 3 for \$3.25

BITTERSWEET

Favorite, with bright glossy foliage, bearing sprays of bright orange berries in the fall.

HONEYSUCKLE

Hall's Japan—Old favorite. White and yellow flowers last nearly all summer; almost evergreen.

Scarlet Trumpet—Handsome clusters of scarlet flowers. Hardy vigorous climber.

JASMINE

White—Good climbing vine with white flowers, very large and delightfully fragrant.

Yellow—Small foliage, flowers large, yellow. Handsome in spring when blossoms appear before leaves.

IVY

Boston—Dainty, lovely vine with small overlapping leaves, forming a dense sheet of deep green, turning in the fall to bright scarlet. Clings tightly to any surface without support.

English—The best for bank covering.

CLEMATIS, JACKMANI

CLEMATIS

2 Year No. 1 Plants \$1.00 each

Clematis should be planted in rich well-drained loam, roots shaded and top in the sun.

Jackmani—The giant purple Clematis, and favorite everywhere.

Henryi—Large sized lustrous white flowers.

Mad. Ed Andre—Large velvety red flowers.

Paniculata—Luxuriant grower, with fine foliage and an abundance of small, white, fragrant flowers.

WISTERIA (Grafted)

Purple or White—The most magnificent of all vines. Lasts for generations, becoming more beautiful each year. 2-yr. plants, \$1.75 each.

SILVER LACE VINE

Beautiful, quick growing vine, with rich, glossy green foliage, and a mass of feathery white bloom.

VIRGINIA CREEPER

Dense, green foliage turns bronzy red in autumn. Clings to wall or any support.

WISTERIA

RED JAPANESE BARBERRY

HEDGE PLANTS

Can You Imagine Anything More Beautiful and Fascinating Than a Living Fence?

Postpaid Prices

Strong No. 1 Plants.....	Each	3 for	12 for
(Except as otherwise listed)	\$1.25	\$3.25	\$12.00

Flowering shrubs herald the advent of spring as surely as do the nesting birds. They add colorful, fragrant blooms to garden and fence corners, and illuminate the permanent screen of evergreens.

Flowering shrubs give the finishing touch so much required by small and large home-grounds. When properly arranged, shrubs will soften the lines of the foundation, will provide an effective border screen, will cover the edges of walls and screen objectionable views. Shrubs may also be used for covering slopes and for dividing the landscape into small sections, and for bordering the outdoor living-room of small homes. A selection of varieties will give a succession of flowers from spring until late autumn and after the foliage has fallen the brilliant berries and branches add color and cheer to the winter landscape.

FORSYTHIA

All varieties are grown for their pretty bright yellow flowers very early in the spring, ahead of their leaves.

Fortunei—Upright heavy arching branches.

Intermedia Spectabilis—Largest, darkest flowers.

HONEYSUCKLE

Morrowi (Bush Honeysuckle)—An upright grower with pure white flowers.

Pink Tartarian—Similar to above, with pink flowers.

KERRIA

Japonica—Slender upright stems and branches. Double orange flowers in the early spring and continue intermittently throughout the summer.

WEIGELA GROUP

ALTHEA (Rose of Sharon)

Bright glossy leaves; flowers similar to a rose. Hardy summer and fall blooming shrub. **Double white, double pink, double purple, and double red.**

BARBERRY

Japanese Thunbergi—An excellent group plant or for hedging. Foliage turns to a bright crimson before falling. Red berries.

Thunbergi Atropurpurea—Same as above except the foliage red at all times.

BUTTERFLY BUSH (Buddleia)

An attractive shrub of spreading pendulous habit of growth; the branches tipped with long spikes of charming perfumed blossoms.

Charming—Long sprays covered with lavender-pink blooms.

Dubonnet—A new dark wine. Large spikes and individual flowers of good size.

Ile de France—Large flowers of rich, reddish-purple, borne in long panicles.

BEAUTY BUSH (Kolkwitzia)

In the spring, the graceful, arching branches of this fine shrub are completely covered with lovely pink flowers. The foliage itself is very attractive.

CORALBERRY

Symphoricarpus Vulgaris—A slender branched upright shrub for shady places. Fruit is purplish red and hangs on well into winter; flowers small, rose colored.

CRANBERRY BUSH (Viburnum Opulus)

Tall growing snowball, producing red berries during late summer and fall.

DEUTZIA

Rosea—White flowers tinged with pink on backs of petals, giving the plants a pink effect.

Gracilis—A dwarf compact form with clear white flowers.

Pride of Rochester—Tall growing, white flowers tinged rose on back.

Flowering Shrubs

PHILADELPHUS

Lemoinei—Rich foliage and large pure white fragrant flowers.

Virginialis—Semi-double flowers blooming very freely in spring and intermittently all summer.

QUINCE

Japanica—A very fine old plant that should find a place in every garden. Red.

SNOWBALL

Opulus Sterile—The old fashioned snowball that blooms in May.

Tomentosum Plicatum (Oriental Snowball)—Showy clusters of double white flowers.

FRENCH BUDDED LILAC

French Budded Lilacs

The French Lilacs are far superior to the old variety, or common Lilac. They produce immense clusters of high colored, fragrant blossoms.

BELLE DE NANCY—Double satiny rose blooms.

CHAS. JOLY—Double flowering purplish-red.

LUDWIG SPAETH—Single dark red, color holds well.

CHAS. SARGENT—Double bluish.

LEON GAMBETTA—Double lilac.

MME. ABEL CHATENAY—Double white.

LILAC COLLECTION

First quality plants: 2 to 3 ft. size, \$1.75 each.

Any three for \$4.50—Postpaid.

BEAUTY BUSH

SPIREA

Anthony Waterer—Crimson flowers blooming profusely all summer if spent flowers are kept cut away.

Thunbergi—A beautiful display of white flowers in the early spring ahead of the leaves. Soft feathery foliage.

Van Houtte—Upright, tall growing with flowers in white clusters.

TAMARIX

Africana—A beautiful shrub with small feathery foliage. Delicate pink flowers.

Hispida—Bright pink flowers, June-July. Very hardy.

WEIGELA

Candida—A fine pure white, which blooms all summer.

Eva Rathke—Dwarf form with red flowers. Blooms continuously throughout the summer.

Rosea—Bright pink bell-shaped flowers.

HYDRANGEA—Each \$1.50; 3 for \$4.00

Otaksi—Profuse double blue blossoms. Low and slow growth. Heavy clumps.

Aborescens (Hills of Snow)—Showy flower heads from June to cold weather.

Paniculata Grandiflora—Large cone shaped flowers of white in August, changing to pink as the flowers ripen.

Hortensis—Large trusses of deep blue flowers.

DOUBLE FLOWERING ALMOND

Postpaid Prices: 2-3 ft. \$1.00; 3-4 ft. \$1.50

These well-known bushy shrubs never fail to produce in early spring, before the leaves appear, small, very double, pink, rose-like flowers that are closely set along the branches.

Evergreen Shrubs

FOR SUNNY LOCATIONS

ABELIA

Grandiflora—Graceful evergreen shrub with arching branches, small reddish leaves turning to bright green, dainty fragrant pink-white bells in spring and early summer. **18-24 inch \$2.00.**

Edward Goucher—New, compact evergreen shrub, glossy green leaves, rich pink flowers produced profusely all summer. **18-24 inch \$2.25.**

COTONEASTER

Henryi—Luxuriant evergreen foliage, large clusters of red berries. Grows 8 to 10 feet in height. **18-24 inch \$2.25.**

Horizontalis—Low spreading shrub with graceful sprays arching out over ground or rocks. The tiny round leaves turn bright red in fall. Red berries. **12-15 inch \$1.50.**

Parneyi—Very showy evergreen, largest of this variety, dark green foliage and clusters of bright red berries all winter. **18-24 inch \$2.25.**

GENISTA

Pilosa—Dwarf procumbent creeping broom. Neat, tidy, slow-growing, and evergreen. One of the most compact and complete ground covers. Small yellow flowers and small foliage. **9-12 inch spread \$1.75; 12-15 inch spread \$2.25.**

HOLLY

English Berried—Glossy deep green leaves, regularly scalloped, abundance of red berries. Traditional for Christmas decoration. **18-24 inch \$4.50; 2-3 ft. \$5.50.**

NANDINA DOMESTICA (Sacred Bamboo)

A handsome slow-growing shrub, leaves much divided, light green tipped with pink and copper in spring, turning to bright red during fall and winter. Flowers white, followed by crimson berries. Very striking appearance during winter months. **12-15 inch \$1.75; 18-24 inch \$2.25.**

PRIVET

Golden—Rapid growing hedge plant. Leaves nearly oval, tinted with golden yellow. **18-24 inch \$1.50; 2-3 ft. \$2.00.**

PYRACANTHA

Prices: **18-24 inch \$2.25; 2-3 ft. \$2.75**

Government Red—Large, bright red berries, profuse blooming Firethorn.

Lalandi—Tallest growing Firethorn, orange-red berries in fall.

Rosedale—Quantities of white flowers in spring, abundance of small red berries all winter. Can be kept trimmed for hedge.

HYDRANGEA
French Hybrid
TROPHEE

HYDRANGEA

SUPERB FRENCH HYBRIDS FOR SHADY PLANTINGS

Chisholm—Large double pink.

Giant White—Large clusters.

Revelation—Finest red.

Royal Blue—Deepest blue.

Trophee—Salmon-pink.

Azaleas — Evergreens Shipped Express or Freight Collect

These shrubs are dug with roots in a ball of earth to insure their growth, and this additional weight adds to shipping cost.

Prices quoted here are low f.o.b. Nursery prices, and shipments are made Express or Freight Collect.

If you wish your plants shipped prepaid, add 20% to prices quoted.

DECIDUOUS AZALEA IN VARIETY

Azaleas

Azaleas prefer partially shaded location and acid soil. The Mollis, Altaclarensis, and Occidentalis are medium size deciduous shrubs; very effective in group plantings, or combined with evergreens. The Hinodegiri, Rosea Flora, Hexe, Ledifolia and Ward's Ruby are dwarf evergreen varieties and very profuse bloomers.

EVERGREEN VARIETIES

Prices: **6-9 inch \$1.50; 9-12 inch \$2.25**

HEXE—Late blooming bright red.

HINODEGIRI—A dwarf type. Bright red flowers in April.

LEDIFOLIA ALBA—Free-flowering white, blooms May to June.

ROSEA FLORA—A low-growing dwarf shrub producing large double-pink flowers in June. **6-9 inch \$1.75; 9-12 inch \$2.50.**

WARD'S RUBY—New evergreen azalea with bright crimson blooms in early spring. Improved Hinodegiri. **6-9 inch \$1.75; 9-12 inch \$2.50.**

DECIDUOUS VARIETIES

ALTACLARENSIS—Deep orange. A Chinese azalea resembling Mollis, except in color. **12-15 inch \$3.00 postpaid.**

MOLLIS (Chinese Azalea)—Very colorful large flowers of bright orange to flame. Very hardy. **9-12 inch \$2.00; 12 to 15 inch \$2.75.**

Deep cream colored Mollis: **50c higher per plant.**

OCCIDENTALIS (Western Azalea)—A native of Oregon. Blossoms of pink to white with the fragrance of honeysuckle. **12-15 inch \$2.75; 15-18 inch \$3.50 postpaid.**

Broad-Leaved Evergreens

Broad-Leaved Evergreens Shipped by EXPRESS OR AUTO FREIGHT COLLECT

These shrubs are dug with roots in a ball of earth to insure their growth; this additional weight adds to the shipping cost. Prices quoted here are low f.o.b. Nursery prices, and shipments are made Express or Freight Collect.

If you wish your plants shipped prepaid, add 20% to the prices quoted.

SHADE LOVING VARIETIES—Early morning sun and acid soil encourage these plants to develop their full loveliness. A loose mulch of leaf mold or compost should take the place of frequent cultivation.

ANDROMEDA

Japonica—Shiny dark green foliage whose new leaves are red-tinged. White masses of drooping flowers resembling large sprays of Lily of the Valley. 12-15 inch \$2.25; 15-18 inch \$2.75.

ARBUTUS (Strawberry Tree)

Uneda—Evergreen plant growing 8 to 15 feet tall, bark red peeling off in thin places, red to white flowers produced in spring, beautiful scarlet fruit in the autumn. 12-18 inch. \$2.00.

AUCUBA

Golddust—Large glossy green leaves spotted with gold. Bright red berries in the fall. (Pollenizer required.) Valuable for shady locations. 12-15 inch \$2.00; 15-18 inch \$2.50.

Green—Like the above but leaves entirely green. Plants bear brilliant red berries. (Pollenizer required.) For shady locations. 12-15 inch \$2.25; 15-18 inch \$2.75.

Pollenizer—12-15 inch \$2.25; 9-12 inch \$1.75.

ANDROMEDA JAPONICA

DAPHNE

Cneo-um—Low spreading growth, short slender leaf, dark green and glossy above with gray beneath. An abundance of fragrant pink flowers both spring and fall. 6-9 inch \$2.00; 9-12 inch \$2.50.

Odo-ra—Bushy evergreen shrub, light green leaves bordered with white. Clusters of very fragrant flowers in early spring. 9-12 inch \$2.00; 12-15 inch \$2.50.

KALMIA (Mountain Laurel)

Latifolia—Oval waxy green leaves, delicate pink flowers borne in clusters. Blooms May-June. 12-15 inch \$3.00; 15-18 inch \$3.50.

Portifolia—Narrow, glossy leaves on upright branches, low growing evergreen shrub. Bright pink blooms, spring and early summer. 12-15 inch \$3.25.

Filifer (Threadbranch)—Green foliage arranged in dense thread or cord-like branchlets. Semi-dwarf. **12 to 15 inch \$3.00 each.**

Filifer Aurea Nana—Dwarf golden form of the above. **12 to 15 inch \$3.50 each.**

YEW

All varieties: 15 to 18 inch \$3.50; 18 to 24 inch \$4.50 each.

Irish—Dense green foliage cover the erect columnar evergreen.

Golden Irish—A golden variegated variety of Irish Yew.

English—Dark green foliage, upright growth.

Golden English—Dense golden-tipped foliage on the erect shrub.

PFITZER'S JUNIPER

Evergreens Shipped EXPRESS OR AUTO FREIGHT COLLECT

These shrubs are dug with roots in a ball of earth to insure their growth, and this additional weight adds to shipping cost.

Prices quoted here are low f.o.b. Nursery prices, and shipments are made Express or Freight Collect.

If you wish your plants shipped prepaid, add 20% to prices quoted.

Rhododendrons

HANDSOMEST OF BROADLEAVED EVERGREENS

The wealth of dark green glossy foliage serves as a background to the numerous large clusters of gorgeous flowers which appear in spring and early summer. Color range in red, pink, white, and purple, in every shade and tint.

The following list includes many of the well-known, time-tested varieties, as well as a number of the English and Dutch Hybrids.

RATING AND CLASSIFICATION

The asterisks (*) indicate the rating of variety as given by the British Rhododendron Association. The letters A, B, and C are used as a guide in the selection of the site for planting. Those marked "A" are hardy and may be planted in full exposure, if desired. Those with "B" classification should have some protection to be grown to best advantage. Varieties marked "C" must have protection from the sun; hardy along coast and in warm gardens.

RHODODENDRON, BUTTERFLY

Rhododendrons Shipped Express or Freight Collect

These shrubs are dug with roots in a ball of earth to insure their growth. The added weight, and special packing necessary, increase shipping costs. Therefore, prices quoted here are low f.o.b. Nursery prices, and shipments are sent Express or Freight Collect.

CAMELLIA MIKENJAKU

FLOWERING CHERRY, KWANZAN

PINK FLOWERING DOGWOOD

Flowering Trees

We pay shipping charges on Flowering Trees

ROSE-FLOWERING CHERRIES

Postpaid Prices:	Each
5-6 ft., branched.....	\$3.00
4-5 ft., branched.....	2.50

Among the flowering trees the rose-flowering cherry takes the lead. They vary in form and therefore may be adapted to many uses in landscape work. Some are vase-form, others pyramidal in growth, but most sorts have wide-spreading branches, vigorous in growth, and still others are rather dwarfish. Nearly all are tinted various shades of pink, and a few are white. Trees are hardy. Known and used in the Orient for hundreds of years, these valuable trees are now rapidly becoming popular and gaining favor in the United States. Both upright and weeping growth.

Kwanzan. Double, rose-pink—Handsomest of all the double flowering cherries. Blooms just after the middle of April (depending somewhat upon locality). The tree is upright and spreading, and at maturity 25 to 30 feet high. Leaves and flowers appear simultaneously. The buds are red, and the fragrant, rich, rose-colored double blossoms are borne in clusters. Flowers are very large, up to 2 inches in diameter. A graceful and beautiful tree for the lawn or grounds, also adapted for planting in parking strips and along avenues.

Shirofugen—15 ft. Has the very largest flowers of any variety that we grow, deep pink in the bud and pale pink in the open flowers. It is almost impossible to describe the beauty of this tree when in full bloom.

Mount Fuji—Pure white; remains attractive; calyx turning reddish with age. A bushy, small tree, hardy, extremely floriferous.

Naden—One of the most handsome types. Semi-double lavender pink flowers.

PINK FLOWERING DOGWOOD

Pink flowering variety which is greatly in demand.

Prices:	Each
24-30 inch	\$4.00
30-36 inch	5.00

Magnolias

SOULANGEANA—Large lily-like flowers come at the end of winter before the leaves. Purplish-pink and lavender outside, pale lavender or white inside. 2-3 ft. \$7.50 each; 3-4 ft. \$10.00 each.

SOULANGEANA NIGRA—Large dark purple flowers. Inside of cup-shaped flower lighter purple in color. 18-24 inch \$5.50 each.

STELLATA (Star Magnolia)—Neat growing large shrub. Flowers 3 to 4 inches across, with many narrow pinkish white petals. 18-24 inch \$5.50 each.

WEeping CHERRY

No. 1 Heads, about 6 feet tall. \$6.00 each

Single Pink Weeping Cherry.

Double Pink Weeping Cherry.

One of the finest weeping trees for lawns and small grounds. The branches are slender and when grafted on tall stems, fall gracefully to the ground. The flowers are rose-colored, appearing before the leaves.

FLOWERING CRAB (Malus)

Postpaid Prices:	Each
5-6 ft., branched.	\$2.25
4-5 ft., branched.	1.75

Produces flower effects equal to those of more talked-of cherries. The crabs are hardy and add a charm of fragrant wildness to a planting.

They are extremely hardy and will thrive in positions and exposures which would be fatal to the more delicately constituted cherries. They also exhibit a greater variety in character of tree, a wider range of color in their blossoms, and in autumn are adorned with glittering clusters of fruit in shades of green, yellow, orange, scarlet, and crimson. No other flowering trees equal the flowering crabs in profusion of bloom, and among the other qualities, varieties may be selected which have a restricted growth or dwarf habit, so that they will never become too large and clumsy.

Atrosanguinea—In early May, every twig and branchlet of the Carmine Crab is covered with clusters of dark pink, almost crimson flowers. Its spreading or weeping habit of growth makes it a handsome lawn specimen.

Bechtel's—The flowers are a beautiful shade of pink, are large, very double and fragrant, resembling little roses. It blooms somewhat later than most varieties.

Eleyi—Attractive reddish foliage in spring changing to pink. Clustered single rose-pink flowers followed by showy red fruit.

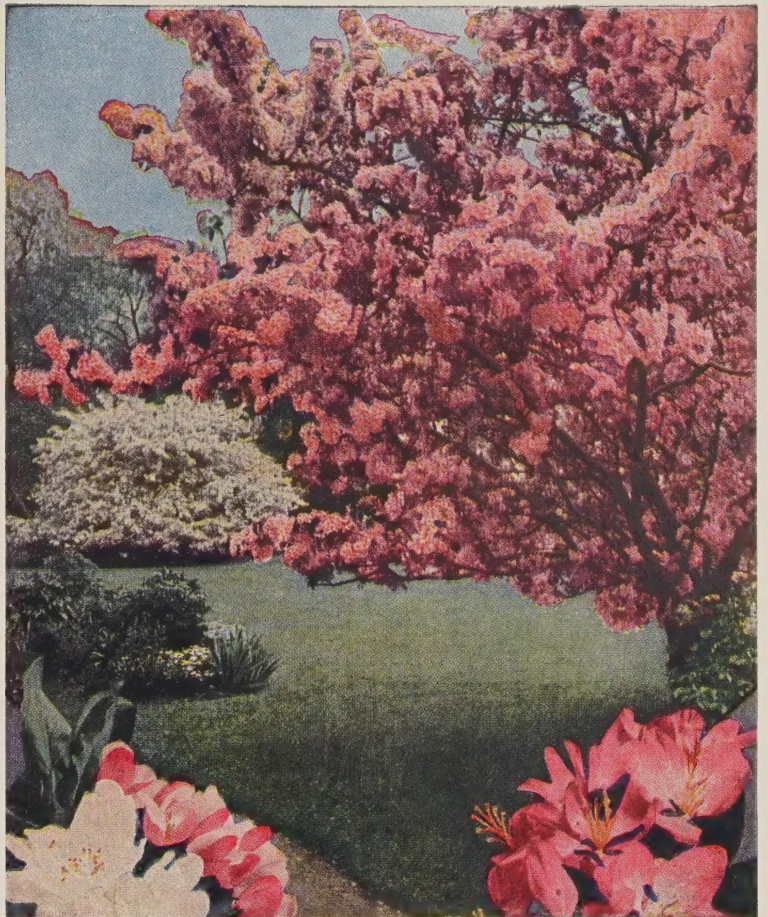

Floribunda purpurea—Its purple foliage and bark, single crimson flowers and fruit make it a distinct departure from the ordinary. The flowers and fruit are carried on long, pendulous stems and are produced in great abundance. A strong grower.

Hopa—A beautiful, upright growing tree with attractive foliage. Entirely covered with rose-colored flowers in April. Fruit red inside and out, hanging on until late autumn. Very hardy and free from disease. Planted extensively.

Parkmani—An irregular shaped little tree when young, Parkman's Crab assumes a most attractive picturesque habit as it grows older. The flowers are bright rosy red, double, and droop gracefully on thread-like pedicels. It is a gorgeous ornament to any planting, and has long been a favorite.

Scheideckeri—The flowers of Scheidecker's Crab are double, bright pink, last a long time, and the fruit, which is produced in great profusion, is waxy yellow. The tree has a regular pyramidal habit, about 15 feet high. Best and easiest to flower.

Spectabilis (Chinese Flowering Crab)—Growth decidedly erect and vase-like. Flowers double, fairly large and light pink, followed in autumn with yellow fruit.

FLOWERING CRABAPPLE

HAWTHORN

Prices: 5 to 6 ft., branched. \$2.75 each
6 to 8 ft., branched. 3.25 each

Paul's Double Red Flowering—Wide spreading irregular, spiny branches, the head about equaling the height in diameter. In May it is very decorative with an abundance of double carmine-red flowers, followed by red fruit.

PAUL'S DOUBLE FLOWERING THORN

Flowering Trees

PURPLE-LEAVED FLOWERING PLUMS

We Pay All Shipping Charges on Flowering Trees

Postpaid Prices:	Each
4-5 ft., light branched.....	\$1.50
5-6 ft., branched.....	2.25
6-8 ft., branched.....	2.75

Small growing, distinct ornamental trees used as specimens or grouped with other trees and shrubs in border or background. Their foliage produces beautiful tones of purple, very attractive where colored effects are desired. The varieties come in pink, white, single and double.

Bliriana—Upright growth with dark purple foliage. The blossoms appearing early in May, are deep pink, double and fragrant. The shape and size resemble the Flowering Almond blooms. This is one of the best varieties. Twelve to fifteen feet at maturity.

Pissardi—Beautiful purple foliage, retaining its color well through the season. It has attractive pale pink flowers in May. Edible fruit excellent for jelly. Fifteen to twenty feet at maturity.

Vesuvius (Burbank's Purple Leaf Plum)—Foliage larger and more reddish than *Prunus Pissardi*. Flowers are slightly larger and later. A very brilliant decorative tree.

Thunder Cloud—This and the *Vesuvius* have the most beautiful foliage of any of the flowering plums. The leaves appear a rich red color and gradually become darker, turning to a very rich purple.

FLOWERING PEACHES

Prices:	Each
4-5 ft., branched.....	\$1.50
5-6 ft., branched.....	2.00

For an easily and quickly obtained mass of spring color, there is nothing to excel the Flowering Peaches. They will grow with the greatest ease anywhere and never fail to produce a great profusion of bloom. Not only are the trees a source of great admiration in the garden, but the trees enjoy having their branches cut for indoor use. (Spray with Bordeaux.)

Double Red—Rich ruby-red. Very large blooms.

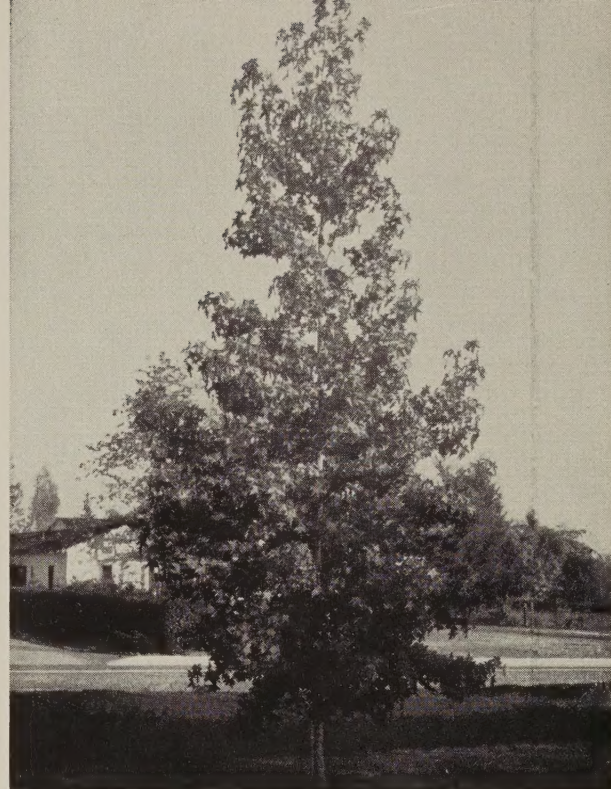

Double Pink—Large double pink. Strong grower.

WEeping PEACHES

Prices: No. 1 Heads.....	\$3.00 each
Double Red Weeping and Double Pink Weeping.	

CHINESE ELM—ULMUS PUMILA

SWEET GUM (LIQUIDAMBAR STYRACIFLUA)

UNUSUAL SHADE TREES

Prices: As listed following variety name.

GINGKO

Maidenhair Tree (Biloba)—This unique tree with its fan-shaped leaves, like those of Maidenhair fern but larger, is unlike any other tree grown. It makes a beautiful addition to lawn or street. Foliage turns bright yellow in fall. 5-6 ft. whips \$2.50 each; 5-6 ft. branched \$3.50 each.

LABURNUM VULGARE

Goldenchain—Beautiful small tree with clover-shaped leaves; flowers are fragrant long chains of golden yellow. 5-6 ft. \$2.75 each; 6-8 ft. \$3.25 each.

HORSECHESTNUT

Pink Flowering—A slow growing dense shade tree with beautiful pyramidal cones of pink flowers. 8-10 ft. branched \$7.50 each.

SWEET GUM

Liquidambar styraciflua—A fine large-growing tree whose leaves resemble those of the maple with five pointed fingers. Glorious blended shades of red from bright to dark in autumn. 5-6 ft. \$2.50 each; 6-8 ft. \$3.50 each.

FLOWERING DOGWOOD

Cornus Nuttalli (Pacific Dogwood)—Native. Pure white flowers six inches across. An exceptionally attractive Dogwood. Nursery grown. Each \$4.50.

A Real Novelty

NORWAY MAPLE, CRIMSON KING

Acer Platanoides schwedleri nigra
Patent No. 735

5 to 6 ft. \$4.00 each; 7 to 8 ft. \$6.00 each

Crimson King is a beautiful form of Schwedler Maple originated in Europe. It is brilliant crimson all through the summer months. Crimson King has been under observation in America for ten years and has kept its brilliant coloring all through the season both in the East and on the Pacific Coast.

WHITE BIRCH

ORNAMENTAL SHADE TREES

Prices:	Each
5 to 6 ft., partially branched whips	\$2.75
6 to 8 ft., branched	3.25

BIRCH

Cutleaf Weeping—A very graceful, clean appearing tree with white bark and slender drooping branches, deeply cleft leaves.

BOX ELDER

Silver Variegated—Creamy white border on light green leaves makes this tree stand out bright in a planting. Grafted trees.

CATALPA

Speciosa (Western Catalpa)—A rapid growing tree with very large leaves, nice clean bark and large white flower heads, followed by long bean-shaped seed pods.

LINDEN

European (Basswood)—Large, full heads. Large leaves similar to Catalpa. A good street tree.

LOCUST (Robinia)

Honey Locust (Gleditsia Triacanthus)—Of much slower growth than the black locust. Small round leaves similar to pepper trees. Very attractive and desirable as an ornamental tree.

MAPLE

Schwedleri—Very similar to the Norway maple except the leaves are purple in early spring.

Dasycarpum (Silver Maple)—Rather slim type with silvery bark and light green leaves.

MOUNTAIN ASH (Sorbus)

Aucuparia—Narrow erect tree with beautiful clusters of red berries in summer.

OAK (Quercus palustris)

Pin—One of the finest oaks for home planting. Straight trunk with symmetrical head of smaller sharp-pointed deeply cut leaves which become bright crimson in autumn.

Red—An excellent tree for park and street planting. Beautiful foliage turning red in autumn.

PLANE TREE (Platanus-Sycamore)

Orientalis—An evenly branched tree with rather broad head. A fine stately type.

REDBUD

Cercis Canadensis—Similar in effect to Hawthorn but of more regular growth. Clusters of rosy pink flowers cover the tree in May.

Shade Trees

We pay all the shipping charges on Shade Trees

By all means plant shade trees. They are effective ornamentally from the time they are set out and soon their spreading growth will create a sheltered environment for the home that will be an increasing pride and joy with the passing years.

FAST GROWING SHADE TREES

Postpaid Prices:	Each
5 to 6 ft., partially branched and whips	\$2.25
6 to 8 ft., branched	2.75

(We Pay All Shipping Charges)

BIRCH

European—Leaves similar to Poplar. White bark and pyramidal form. A fine street tree and very hardy.

ELM

Chinese (Ulmus Pumila)—A rapid growing tree with a dense head. Extremely hardy.

MAPLE

Norway (Platanoides)—Large rapid growing tree that will cast a dense shade.

POPLAR

Lombard (P. nigra italica)—Tall, narrow growth. With age becomes one of the most striking and picturesque trees.

WILLOW (Salix)

Babylonica Weeping—The most effective large growing willow, narrow green leaf.

Niobe (Golden Weeping)—Golden bark, graceful weeping habit.

SPECIAL NOTE: We can supply, and will be glad to quote smaller "Economy Sizes" of Shade and Flowering Trees on request. However, the quality of trees quoted here will develop quickly, and will give a maximum of pleasure and satisfaction to the planter.
